

Libra is a vendor of software solutions for Enterprise Asset Management. Our development sites are located in Mannheim (Germany) and Sofia (Bulgaria), where developers, business analysts, and customer consultants are working on development, maintenance and support of the Libra System. We are looking for highly motivated software engineers from all parts of Europe to bring in their ideas and experience to help us reach our goals.

For our office in **Mannheim**, we are currently looking for a

Java Frontend Engineer (m/f/d)

Your profile:

- Degree in Computer Science or a related technical field
- 3+ years of experience with JavaScript including concepts like asynchronous programming, closures, types, and ES6
- Experience with React
- 3+ years of HTML/CSS experience, including concepts like layout, specificity, cross browser compatibility and accessibility
- 3+ years experience with browser APIs and optimizing frontend performance
- Fluent in German and English
- Naturally curious and inquisitive
- Team player

Your tasks:

- Implement the features and user interfaces of Libra products
- Architect efficient and reusable frontend systems that drive complex web applications
- Collaborate with Product Designers, Product Managers, and Software Engineers to deliver compelling user-facing products
- Identify and resolve performance and scalability issues
- Collaborate on our technology roadmap
- Participate in agile development

What we offer at Libra:

- A competitive salary
- A full-time position with a permanent contract
- Friendly and knowledge-driven environment in which you continuously learn and improve
- A strong and motivated team of professionals to support you in your daily tasks
- Flexible working hours

Take the next step!

If you felt intrigued, please take the next step and submit your CV to Mr Johannes Ehringer at nextstep@libra.de
